CATALOGUE OF PRODUCTS

HIGH QUALITY PRINTING

We develop solutions for your specific needs, to emphasize its appearance and most of all, to increase the shelf life of the products.

Currently we cover the following industries:

- Fresh and processed food
- Fats and shortenings
- Tea
- Hygienic
- Gelpack
- Diapers
- Bags for grapes
- Nuts
- Cleaning

RESEARCH AND DEVELOPMENT

The constant search for new formulas, structures and finishes adds value to the final product, reduces costs and minimizes environmental impacts. For this purpose we count with an advanced laboratory with modern instruments that let us assure an excellent quality in all our processes and products.

SUSTRATES

Our technology allows us to combine several materials as:

- Polyethylene
- BOPP
- CPP
- PET
- MET PET
- Polyester

In one, two or three layers of different thickness, to achieve the best performance depending on the mechanical properties your product needs.

PRINTING

UPC works with the best technology available for flexographic printing. We can provide 100 tons per month of high quality printed film:

- Up to 8 colors
- 1290 mm wide printed film
- 720 mm between eye mark registers

■ LAMINATED

The solvent less process of laminating the different substrates, allow us to give barrier properties to the packaging and better mechanical strength and protection, adding value to your products.

■ CUT AND REWIND

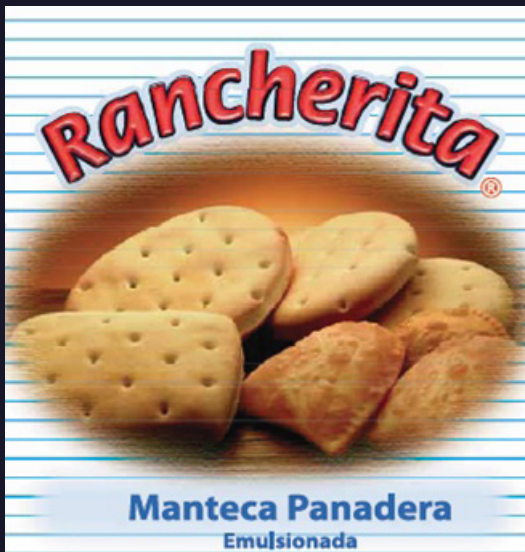

Our modern machines allow us to size the film to width and diameter according to your specific needs.

SEALED

We can offer a variety of sealed bags, such as:

- Smartbags - Pouch
- Wickter
- Zípper
- Easy open
- Square bottom
- Gusseted
- Bottom Fold
- Three or four seals
- Grip in different formats
- Pre perforated

Brands of the products displayed are the property of each client.
